About FICCI Skill Development

Skill Development is the key to promote employability, competitiveness, and economic growth. As Indian industry and services grow and compete internationally, the availability of requisite skills - in terms of quantity, relevance and quality has become an urgent need. The speed and scale with which this skill deficit is bridged will be critical in determining India's competitiveness in global market. FICCI Skill Development is committed to work with the stakeholders, especially the industry, government, TVET institutions, Skill Universities, International development organizations and academia to create sustainable and scalable skills propositions which will benefit the youth of the country from all sections of society.

Key areas of work

Policy Advocacy

The Committee publishes a diverse array of industry reports, policy briefs, and papers that intricately capture the evolution and progress within the Vocational education sector. These include knowledge papers such as 'Future of Jobs- 2017, 2018 & 2024,' 'Skill India Reforms - 2023', 'Career Guidance & Counselling Framework in India-2021,' 'Apprenticeships in India-2019', 'High Quality Demand Driven Skilling in India - Electronic Manufacturing -2023', 'Skill Financing Models in India-2023' and 'Reimagining Vocational Education in India-2022'. Notably, these reports have significantly influenced the design of the National Education Policy (NEP) 2020. We have been consistently working with Ministry of Skill Development & Entrepreneurship, Ministry of Corporate Affairs, Ministry of Labor & Employment and other ministries in providing inputs and recommendations for effective formulation/ implementation of various flagship skill schemes in the country.

Industry Engagements

The committee engages deeply with industry members on various areas of synergy. From Apprenticeship promotion Workshops to development of entrepreneurs through our traditional cluster development program, the committee ensures rich interactions and inclusion of industry in all our initiatives. We annually engage with the Youth through our World Youth Skills Days Celebrations and Career Guidance and Counselling workshops. The members of the committee represent FICCI at various national and international forums such as BRICS, World Skills Competitions, State Skill Summits and many more.

Thought Leadership

The Skills committee collaborates with key stakeholders in the Indian government and industry, actively identifying opportunities and addressing the gaps. Through intensive consultations with a diverse array of stakeholders, this collaborative effort unfolds across various conferences, discussions, events, and forums. Brimming with shared wisdom and expertise, these engagements have played significant role in propelling the skills development sector forward in India.

Global Skills Summit

The Committee hosts the Annual Global Skills Summit which is a gathering attended by all the important stakeholders on the Indian TVET & Industry ecosystem. Established in 2007, the summit is a global forum for discussions on the transformation of the skilling landscape, changing nature of jobs, promoting & collaborating with the stakeholders of the sector. Since its inception, the summit has also drawn thousands of participants, including sector experts, policymakers, academicians and Industry experts, converging on a common platform to shape the future of skilling in India.
